

PHASE 1 COLLECT THE FOOD BOWLS

08:00 · quickly

The kitchen is waiting for the bowls to make up the rations. **Do not clean anything yet.** Wheelbarrow + 1 empty bucket for the leftovers. Sort them by enclosure.

- ☐ **AMAZONAS + PATO** 3+1
The duck's water first — he bathes in it. The tap is right there, no wheelbarrow needed. Twice a day: now and at 16:00.
- ☐ **BLUE** — on his own, opposite reception. His little bowl. Water comes in phase 2. 1
- ☐ **TORTOISES** 2
- ☐ **CUYES** — guinea pigs 1
- ☐ **DOMO** — the enclosure next to the cuyes 5
- ☐ **PARABAS ROJAS** — 1 on its own + 3 together (one pair among them). They bite: get in and out fast. 1+3
- ☐ **COTORRITAS** 2

TO BRING BACK

19 bowls

Back at base: rinse with water → **upside down to dry** → **only on the two bottom shelves** (those are zone 2's) → grouped by enclosure.

PHASE 2 WATER AND CLEANING

same order

Kit: broom · dustpan · brush · a bucket for waste · a bucket with a quarter of water.

Everywhere, same moves: brush the board → sweep the floor → refill the water. In that order.

- ☐ **AMAZONAS + PATO** — change everyone's water · board then floor
- ☐ **BLUE** — water through the bars, his drinker is fixed · broom in through **both entrances** · brush his board **then the floor** · he may come out: keep an eye on him
- ☐ **TORTOISES** — tap on the ground: the water comes out of the stone tortoise, change it. **WEEKLY CLEAN** — other days, just the droppings.
- ☐ **CUYES** — water · rarely dirty, not every day
- ☐ **DOMO** — water · brush **both boards then the floor**
- ☐ **PARABAS ROJAS** — the lone one: water through the bars, **no cleaning at all** · the other 3: go in, brush the board **then the floor**
- ☐ **COTORRITAS** — water if empty
- ☐ **INSEPARABLES** — no bowl in phase 1: this stop only exists in this phase. Water and seed **every 2 days**. **WEEKLY CAGE**
Blow on the seed : if it flies off, those are empty husks — top it up.

PHASE 3 MORNING FEED

after the break

Same route with the bowls ready, then the 4 species **without bowls**: poured straight into the trough, wheelbarrow for the horses.

- ☐ **THE 19 BOWLS** — phase 1 order. 19
Blue: push him towards the back with a stick, then **wedge his bowl between the boards** or he tips it over.
- ☐ **TEJONES** — 3 coatis. Change the water. 2 drawers: open fully in one go, never halfway — they slip out through the gap. 2
Half a ration per drawer.
Bananas: their favourite, and the weakest one never gets any — always the same one. **Keep 1 or 2 bananas back and give them to him separately.**
- ☐ **HORSES** — 1 wheelbarrow of cabbage leaves, ask in the kitchen. Nogal, the black one, eats Primavera's share, the white one: **throw leaves far off to draw Nogal away, then make 2 separate piles.** 1
- ☐ **PIGS** — 3. **Separate the little female** with the partition and feed her **through the bars**, or they fight. The other 2: open up and serve. 3
- ☐ **No cats in the morning.** Never. They are phase 4 only, from 16:00.

PHASE 4 THE AFTERNOON

from 16:00

4 species, plus the duck's water. Nothing else.

- ☐ **DUCK** — second water change of the day **water**
- ☐ **CATS** — the wildcat and the ocelot, **every other day: check the planning.** 3
Meat out of the freezer the night before — without it they do not eat. Check it every evening.
The one who lives alone: serve and step back, claws.
The 2 who live together eat apart: lure one into the small cage, feed him in there and let him eat — the other eats in peace.
- ☐ **TEJONES** — same 2 drawers, same opening rule, same banana kept back 2
- ☐ **PIGS** — separate the little female, same as the morning 3
- ☐ **HORSES** — draw Nogal away, 2 separate piles 1
